

A Continuous Classroom Improvement Campus

Continuous Classroom Improvement is a vehicle utilized to increase student engagement and student achievement.

Caddo Grove Elementary is dedicated to a continuous improvement process that helps students give input into what works and what needs to be improved on a weekly basis. Teachers and students chart the results of their work and it is displayed in the classroom. Teachers and students work together to monitor progress toward class and course goals. During the week students and teachers will make a plan, do the plan, study how they did during the week and then decide on what actions they will take the next week to do even better.

THE CCI classroom is the first step in our continuous process. In a CCI classroom you will see:

- A classroom mission statement
- Norms for behavior and expectations
- Goals and measures aligned to learning standards
- A chart indicating class progress
- Plan, Do, Study, Act board which includes a targeted objective for the subject
- A graph of learning results
- A plus/delta of previous learning (what's working and ideas for improvement)
- Plan for the week (what the students will do and what the teacher will do)

Student data folders are an extension of the CCI process.

- Student data folders provide a way for students, teachers, and parents to keep track of student performance.
- Students take ownership and responsibility for their learning by setting individual goals and then track their own performance to determine progress.
- All classrooms will be implementing data folders in the future.

Parent and family support an important part of the CCI process.

- Discuss with your child the weekly goal his or her class has set.
- Ask your child what he or she is learning and how he or she learns best.
- Celebrate with your child not only when goals are met, but when progress is made.
- Provide feedback to your child's teacher on your child's learning process.
- Ask questions to learn more about the process.
- Volunteer to help at school to support learning activities.

CCI engages all students in the learning process to increase student achievement!
